Guruji - Introduction

In November 1994, Guruji was gifted and enlightened with Divine Spirit. Over the last 10 years, Guruji's Divinity has guided him through the transition from life as an engineer, husband and father into a new life that has taken him to 35 countries during which time he has bestowed over 70,000 blessings and has counseled over 100,000 people.
The word enlightenment is very common in our new age vocabulary but most people do not understand the essence of what it actually means. Millions of people around the world are hoping for and are promised enlightenment if they pray, chant, and practice yoga, help the poor or follow rules and rituals. However, true "enlightenment" is not something that a human can strive for. It is granted by Divinity only and Guruji is the earthly embodiment of Divine enlightenment.

Guruji's unique qualities can be summarized in the following points:
1. Guruji was gifted with Divine enlightenment and is clear that his destiny is to bestow Divine blessings to a select group of people who will experience happiness, freedom and liberty in their life.
2. Guruji does not require his followers to subscribe to any particular religion, technique or practice in order to receive a blessing or experience happiness, which is the ultimate expression of life. In this way he is different from the other guru's, swamis and spiritual leaders in the west.
3. Guruji does not bless everyone who requests a blessing. He is very clear that his Divine blessings are only for those who are in his destiny. He is also clear that he is not meant to be in everyone's destiny.
4. Guruji's Divinity has always instructed him that he is meant to be in the United States and will be very popular with scientists, business leaders, celebrities and government leaders. Of particular importance is the scientific community who will be able to make new discoveries in psychology, biochemistry, genetics, physiology and technology during the process of studying him. The results of their work will prove the presence of Divinity and the impact of Divine energy.

First, he is very clear that his destiny is to bring genuine happiness, liberty and freedom to people through Divine blessings that bring miraculous changes into their lives. These changes include relief from chronic and acute mental and physical conditions and return to health, positive work or job opportunities, increases in finances, improved love or family relationships or peaceful dissolution of relationships, or what ever the person might pray for or need to ultimately experience happiness in their lives. Some of the select people who are in Guruji's destiny may not suffer from a

lack of opportunity, social status or financial resources yet still describe themselves as being unhappy. These people receive tremendous benefit from the Divine blessing. Guruji's Divine blessings have also changed the lives of people having neurological disorders, chronic fatigue, fibromyalgia, menstrual dysfunction, depression, those with undiagnosed conditions or those with conditions that have not responded to conventional therapies.

Secondly, Guruji is unique from all other spiritual leaders as he does not subscribe to or require his followers to abide by any particular religion, technique or practice. In comparison to some international Indian figures that are well known in the west:

1. **Sai Baba** is here to help the masses through the philosophy of universal love, brotherhood, and service to humanity and the poor. Also, Sai Baba performs the feat of materialization and dematerialization as a way to convince his followers of his Divine power, however, he is restricted to India and cannot leave the country. Guruji's destiny is not for the masses and the evidence of his Divinity is witnessed by the miraculous changes experienced by those he blesses.
2. **Maharishi Mahesh Yogi** is another international spiritual leader that Guruji is compared to. Maharishi Mahesh Yogi requires his followers to learn a particular technique of mediation and yoga as well as advanced studies in the Bhagavad-Gita to receive benefits. Guruji has no such requirements. He bestows a Divine blessing and the results occur. He is not here to train or teach others in a particular technique, philosophy or religion.
3. **Osho** was similar to Maharishi in his teachings however, there is one distinguishing point that Osho made that unites him with Guruji. This is regarding Divine sexual energy. Guruji was told by his Divinity to personally refrain from sexual relations (when blessed and told to renounce his life, he and his wife divorced so he could follow his destiny). Yet he is very clear that Divine sexual energy is very positive and can be directed to bring great happiness in one's life. After a blessing, many recipients, especially women, experience an increase in sexual desire. Unlike Osho, Guruji does not make this increased sexual expression into a religion or religious experience. He describes it as a natural part of the miraculous return to health, youthful vitality, vigor and happiness. Also, unlike other celibate guru's and swamis, Guruji is comfortable having physical contact with women through handshakes, hugs, and other non-sexual expressions of affection.
4. Guruji differs from **Buddha**, who also identified the experience of happiness and absence of suffering as the ultimate human experience, in that he does not require followers to study a philosophy or follow particular rituals or techniques.

The third point that makes Guruji unique is that he does not bless everyone who asks- only those whom his Divinity instructs him to bless. Other gurus, swamis and spiritual leaders who are for the masses perform miracles to authenticate themselves or to inspire others to have faith in them and Divinity. Guruji understands that he is not here to change anyone's destiny, and therefore it is not up to him to determine whom he

is to bless, or not. Divinity determines a person's destiny and Guruji will only bless those whom his Divinity instructs him to. For this reason, some people with terminal illness are not meant to receive a blessing, which would change their destiny.

The fourth point is that Guruji was instructed by his Divinity from the beginning to become an international figure that will be especially popular in the United States. He was also instructed to work with and impact a small but elite segment of the population, particularly scientists, business leaders, celebrities and government leaders. He was told that this group may be self-serving and arrogant, and yet, tests done by scientists on Guruji will provide this group and the world with quantitative and concrete data that gives evidence of the presence of Divinity and Divine energy. Guruji has been told that he has a different physiology including unique biochemistry, genetics and nervous system all of which, will be studied and lead the scientists to new discoveries in psychology, medicine and technology.

GURUJI IS NOT A HEALER NOR IS HE A CHANNEL. THE CELLS, FLUIDS AND DIVINE ENERGY OF HIS BODY WILL NOT BE FOUND ANYWHERE ELSE ON THIS EARTH. HE IS NOT CHANNELING DIVINE ENERGY, HE IS EMBODYING IT.

THE ROLE OF THE SCIENTIST IS TO CREATE A PARAMETER FOR AN ENLIGHTENED BEING, ONE THAT CAN BE USED TO PROTECT THE PUBLIC FROM FALSE PROMISES AND EXPLOITATION. THE TIME IS RIGHT FOR SCIENTISTS TO BE ABLE TO MEASURE DIVINE ENERGY AND THE IMPACT IT HAS ON OTHERS AND ON THE EARTH. THIS KNOWLEDGE WILL HAVE A TRULY SIGNIFICANT AND HISTORICAL IMPACT ON THE WORLD, AS WE KNOW IT.

GURUJI SAYS THAT THE SCIENTISTS WHO'S DESTINY IT IS TO WORK WITH HIS DIVINE ENERGY WILL BE WORKING FOR THE BETTERMENT OF SOCIETY WORLDWIDE. THIS ACT OF CREATION AND DISCOVERY WILL BENEFIT MANKIND AND THE ROLE OF SCIENTISTS IN THE WORLD WILL CHANGE SO THEY WILL NOT LACK FOR RESEARCH MONEY OR FACILITIES IN THE FUTURE AS SOCIETY WILL RECOGNIZE THE ACT OF CREATION THAT BROUGHT THEM TO RECOGNIZE DIVINITY.

It is said that Guruji is amazing and beautiful and that being with him is like talking to God. An exchange that touches so deeply will stay with you the rest of your life. Look into his eyes and know.
